Wiki 文档

官方要求：

1. Wiki 的设计，布局，样式均不设限
2. Easy-reading
3. 有关所上传的图片和文件的命名格式问题（程序必读）：

    You can upload your pictures and files to the iGEM 2017 server. Remember to keep all your pictures and files within your team's namespace or at least include your team's name in the file name.

    When you upload, set the "Destination Filename" to

    `T--YourOfficialTeamName--NameOfFile.jpg`. (If you don't do this, someone else might upload a different file with the same "Destination Filename", and your file would be erased!)

4. 其他问题（程序必读）：

    1. **Teams cannot edit, disable, hide, or alter the iGEM Login Bar**
    2. **Teams must use the Standard Pages on their wiki to be considered for awards and medals**
    3. **Teams cannot use Adobe Flash on their wiki**
    4. **Teams must host *all content* on 2017.igem.org**

        All team pages, images, documents *and code* must be hosted on the *2017.igem.org* server.

        Load your CSS and Javascript into the wiki, either directly into your page or using templates. Do not link to scripts or stylesheets that are hosted on other servers.

        We preserve all iGEM content on our own servers so future teams can learn from what you have done. When you store content on your own sites or servers, after time, links might become broken, sites might go down, and information will be lost.

        Additionally, hosting content outside of 2017.iGEM.org allows teams to change/add information to their wiki after the wiki freeze. Please note that altering content after the wiki freeze is a **form of cheating**.

        Bootstrap Note: If you want to use Bootstrap in your wiki, you will need to copy the CSS code from Bootstrap and create Template File on the 2017.igem.org server with that CSS code in order to use Bootstrap in your wiki. You CANNOT use CDN support for your wiki. As this rule explains, all content **must** be on 2017.igem.org.

    5. **Teams cannot use iframes on their wiki**

        iframes are not permitted on the iGEM wiki. See number 4 above.

    6. **Teams cannot use any Copyrighted materials on their wiki, included images**
    7. **Teams cannot alter content after the Wiki Freeze deadline**

Important: The week before wiki freeze, iGEM experiences higher than normal traffic which can lead to strain on our servers and sessions timing out for users. iGEM HQ recommends that users do not wait until the last days to work on/finish their wikis.
